I MARINE EXPEDITIONARY FORCE ORDER 5100.2 **W Ch1**

From: Commanding General
To: Distribution List

Subj: **SAFETY REGULATIONS FOR THE SPECIAL OPERATIONS TRAINING GROUP, CLOSE QUARTERS BATTLE SECTION, STANDARD OPERATING PROCEDURES (SOP FOR SOTG SAFETY)**

Ref: (a) Memorandum of Understanding CG MCB ltr 4000 BL 15/5
dtd 19 May 92
(b) BO P3500.1G

Encl: (1) Range Safety Brief
* (2) Close Quarters Battle Shooting House Procedures
(3) Range Safety Brief for Range 130 Breacher Pit
(4) Range Safety Brief for Range 600 Breacher Pit
(5) Guidelines for Instructors Conducting CQB Training
* (6) Range Safety Brief for Range 130 Sniper Fire
* (7) Range Inspection Checklist

1. Purpose. To provide safety regulations for all Close Quarters Battle (CQB) live fire training/exercises conducted by the CQB section of the Individual Training Section, Special Operations Training Group, I MEF.

2. Background. Per reference (a), I MEF is the controlling agency for Range 130. In consonance with reference (b), it is necessary to establish regulations amplifying the safe conduct of Special Operations Training Group (SOTG) courses taught at the range. These safety procedures are in addition to reference (b) and in no way negate I MEF's responsibility to comply with the provisions of the Base Range Safety Regulations.

3. Information

a. The Assistant Chief of Staff, G-7 is the executive agent for control and operation of Range 130. The range will function under I MEF control, per reference (a), and in compliance with reference (b) and this Order.

b. The enclosures cover standard safety regulations for all Range 130 training, exercises and evaluated events which use live ammunition and explosives.

RANGE SAFETY BRIEF

1. The Range Safety Officer (RSO), will give a safety brief to all hands prior to any live fire taking place on range 130. The RSO will read the following in its entirety:

a. I am the safety officer for today. I am responsible for safety aboard range 130, and as such have the final decision over all matters I consider to be safety related.

b. Ensure range flags are up.

c. Is the safety vehicle on site? Is a qualified driver present? If the driver departs with a casualty or for any other reason, firing must cease, unless another vehicle with driver is present.

d. Is there positive communications with range control? Is the radio/telephone watch set? Has a request to go hot been made? Has it been approved? Range control checks must be made every 30 minutes when firing is in progress and every hour when cold. If communications breaks down, firing stops until re-established. Range control must be notified when going cold and hot. If ammo is being stored on the range, hourly radio checks must be made after training hours every hour until 2200 and start again at 0600 the next day.

e. There must be a non-firing corpsman present during all live fire. If the corpsman leaves, firing must stop.

f. A range sentry will be posted at the gate with communications and access roster to prevent unauthorized access to the range during training. Anyone not on the access roster must be called to the SNCOIC or OIC of Range 130 for approval - names must be called off the individual's ID card.

g. Only instructors, unless otherwise directed, are authorized to park their POV's behind the Range 130 classroom. All others will park at the gate leading to the range.

h. The speed limit on range 130 road is 25 mph unless otherwise posted.

i. Ammunition Handling:

(1) Ammunition must be guarded by a minimum of one (1) armed guard when the range is cold.

ENCLOSURE (1)

(2) You are reminded that it is against regulations to remove any ordnance item, live or blank small arms ammunition, demolition materials, to include component parts for charge construction, misfired or dud ammunition or explosives, or any other ordnance expended or unexpected, from the range. Such items will be turned into the ammunition supply point daily. Individuals will personally check their weapons, their pockets, all magazines, and all magazine or equipment pouches for loose ammunition prior to departing the range.

(3) Ammunition will be issued from a single issue point. All loading will be done in the proximity of the issue point or on the firing line. No ammunition will be loaded or unloaded in billeting or rest areas.

j. Range Safety Rules:

(1) Treat all weapons as loaded even after you have ensured them to be unloaded.

(2) Never let your muzzle cover anything you're not willing to destroy.

(3) Keep your finger off the trigger and out of the trigger guard unless you're on target with the intention to shoot.

(4) Be sure of your target and consider your background.

(5) Eye and Ear protection are required at all times while on or near the firing line or shooting house.

(6) All ammunition malfunctions will be reported

(7) Immediately report all negligent discharges to the RSO. A counselling sheet will be written and the shooter will be counselled by his team instructor. If the same shooter has another negligent discharge he will be dropped from the course. No shooter dropped from a course as a safety violator will be permitted to attend any subsequent course. The drop counseling sheet will be forwarded by the OIC, Individual Training Branch, Special Operations Training Group, to the Commanding Officer, 1st Force Reconnaissance Company, for inclusion on page 11 of the Marine's SRB.

(8) Fire danger rating procedures will be followed as they pertain to this range. The current fire rating is _____.

(9) No person will live fire in the shooting house until he has been given a safety brief per the range regulations for Range 130.

ENCLOSURE (1)

(10) Any time you hear multiple whistle blast or "cease fire" you will put your weapons on safe and let it hang, sling, or holster it and stay where you are until told to do otherwise. Anyone may call a cease fire but the RSO will be the only one to make the range hot again.

(11) During any live fire or dry practice all shooters will be on the same yard line and will not move down range until the line is clear. There will always be one instructor in charge of the line during live fire and at least one student or instructor during dry practice.

(12) An SOTG instructor must be at Range 130 at all times to observe any law enforcement agency or other units utilizing the range to ensure all safety procedures are followed.

(13) All other range regulations are per reference (b).

ENCLOSURE (1)

CLOSE QUARTERS BATTLE SHOOTING HOUSES PROCEDURES

- *1. The Senior Instructor at the house will give the following Safety Brief to all shooters participating in any live-fire run in either shooting house at Range 130.
- a. Treat all weapons as if loaded even after you have ensured them to be unloaded.
 - b. Never let your muzzle cover anything you're not willing to destroy.
 - c. Keep your finger off the trigger and out of the trigger guard unless you're on target and with the intention to shoot.
 - d. Be sure of your target and consider the background.
 - e. Take weapons off "safe" at the LCC position and place back on safe when you exit the main breach point.
 - f. Do not shoot from one room into another room, from a room into a hallway or hallway into room.
 - g. Do not shoot targets that are falling or laying on the deck; if in doubt, do not take the shot.
 - h. If there is any doubt in your mind, do not take the shot and it will be discussed during the debrief.
 - i. If you enter a room and go the wrong way, stay in that sector of fire. Do not try to cross over; your teammate will key off you.
 - j. Do not shoot out of your sector of fire.
 - k. Do not shoot within one meter of a teammate.
 - l. Go slow, target I.D. front site, press, low ready and clear the rest of your sector of fire.
 - m. Weapons will never be at high port pointing towards catwalk or ceiling.
 - n. Flash Bang Procedures:

ENCLOSURE (2)
Ch 1 (21 May 93)

- (1) LOOK to see if you have an opening.
 - (2) PULL the pin.
 - (3) THROW/roll the flash bang 3 to 5 feet inside the opening.
 - (4) WAIT for the bang before you enter the room.
 - o. The use of police tape, engineer tape or riggers tape will indicate a no play area.
 - p. The use of a red chemlight will indicate a no flash bang area, but will still be cleared.
 - q. The use of a green chemlight will indicate a shotgun or mechanical breach point.
 - r. The use of a blue chemlight will indicate a VIP area.
 - s. Walls painted white or marked with white chemlights are no-shoot walls.
 - t. When handling or covering actors, weapons will be on safe.
 - u. Only one hand will be flex cuffed on actors when going down stairwells or being transported. It will be loose enough to slip two fingers between the cuff and wrist.
 - v. Eye and ear protection along with body armor are required by all personnel in shooting houses.
 - w. If you hear multiple whistle blasts, a cease fire command, or cease fire alarm, put your weapons on safe and let them hang, sling or holster and stay where you are.
 - x. In case of fire; cease fire, put weapons on safe and put out fire with designated fire extinguishers. If fire is out of control; evacuate.
 - y. The code word **SNAKE BITE** means actual medical emergency.
- *2. The following guideline will be utilized by the instructors when setting up the shooting house.

ENCLOSURE (2)
Ch 1 (21 May 93)

- a. No targets placed on furniture.
- b. Targets will be placed only on target stands.
- c. Use designated target stands.
- d. Ensure fire extinguishers are in place.
- e. Ensure eye and ear protection with body armor is worn by all personnel in shooting houses.
- f. Use only designated breach points for explosive entry.
- g. All brass, targets and trash will be removed daily.
- h. Only 9mm hard ball, .45 cal hard ball, .38 cal hard ball and 12 gauge lock buster is authorized in shooting houses.
- i. No hollow point, 5.56, 7.62, and 12 gauge 00, buck or slug allowed in shooting houses.
- j. Minimum of four instructors will man the cat walks.
- k. Instructors will have whistles on them at all times.
- l. Instructors will review and brief all medical procedures.
- m. In addition to the above mentioned safety considerations for both the new and old CQB houses, the following are additional criteria pertaining to the NEW CQB house ONLY:
 - (1) Ensure no targets are placed over any electrical outlets.
 - (2) Ensure no targets are placed on the overlap of the rubber protection mats. Screws could present a hazard.
 - (3) Do not remove any vents.
 - (4) SOTG instructors will set the light switches.
 - (5) The generator will only be operated by SOTG instructors.

ENCLOSURE (2)
Ch 1 (21 May 93)

I MEFO 5100.2 w ch1
6 Nov 92

(6) The mechanical units will only be operated by SOTG instructors.

(7) SOTG instructors are the only personnel that are allowed inside of mechanical units.

(8) SOTG instructors are the only personnel allowed in the electrical outlet room.

(9) SOTG instructors are the only personnel that can check oil and fuel for the generator.

(10) If fire occurs, turn off power and extinguish fire.

(11) No sniper targets will be placed on top of building or near any mechanical units.

(12) House will be locked daily.

(13) All power will be turned off at the end of the training day.

(14) If intercom system is down, instructors will follow in trace inside the shooting house.

(15) The Range Safety Officer (RSO), will record the following information after conducting any live or practice exercises utilizing the CQB house in the permanent log book, to be maintained at Range 130.

(a) Listing of all instructors, by name, entering the CQB shooting house.

(b) Number of personnel utilizing the CQB house.

(c) Rounds fired inside the CQB house to include type of rounds and number of rounds fired.

(d) Time spent inside the house.

(e) Training Unit.

(f) Date of Event.

ENCLOSURE (2)

**RANGE SAFETY BRIEF
FOR RANGE 130 BREACHER PIT**

1. The Range Safety Officer (RSO), will give a safety brief to all hands prior to any live fire taking place on range 130. The RSO will read the following in its entirety:

a. I am the Range Safety Officer for today, I am responsible for safety aboard Range 130, and as such have final decision over all matters I consider to be safety related.

b. The fire danger rating procedures will be followed as they pertain to this range. The current fire danger rating is _____.

c. Ensure the range flags are up.

d. Is the safety vehicle on site? Is a qualified driver present? If the driver departs with a casualty or for any reason, firing must cease, unless another vehicle with a driver is present.

e. Is there positive communication with range control? Is the radio/telephone watch set? Has the request to "go hot" been made? Has it been approved? Range control checks must be made every 30 min. when firing is in progress and every hour when cold. If communication breaks down, firing stops until re-established. Range control must be notified when going hot and cold. If ammo is being stored on the range, hourly radio checks must be made after training until 2200, and start again at 0600 the next day.

f. There must be a non-firing corpsman present during all live fire. If the corpsman leaves, firing must stop.

g. A range sentry will be posted at the entry to breacher pit with communication and access roster to prevent unauthorized access to the range during training. Anyone not on the access roster must be called to the SNCOIC or OIC of the range for approval. Names must be called off the individual's ID card.

h. The speed limit on range 130 road is 25 mph unless otherwise posted.

i. Ammunition Handling:

ENCLOSURE (3)

(1) Ammunition will be issued only by SOTG instructors.

(2) Ammunition must be guarded by a minimum of 1 armed guard when the range is cold.

(3) You are reminded that it is against regulations to remove any ordnance item, live or blank small arms ammunition, demolition material, to include component parts for charge construction, misfired or dud ammunition or explosive, or any other ordnance. Such items will be turned into the ammunition supply point daily.

j. Range Safety Rules:

(1) No horseplay.

(2) No running on the range with explosives at anytime.

(3) Never mix blasting caps and explosives.

(4) Do not put blasting caps or explosives in your pockets.

(5) Firing systems will be kept in a safe area as directed by the instructor, separate from the charges.

(6) Charges will not be primed in until last cover and concealed (LCC) position.

(7) Before shot is fired breacher will insure team is in a safe area. SOTG instructor will insure this is done.

(8) Breacher will maintain positive control of firing device.

(9) There is a 30 min. wait time on all non-electric misfires.

(10) Maintain positive control of the firing device/firing system.

(11) Only instructors will investigate and clear misfires.

ENCLOSURE (3)

(12) Don't take any explosives or other materials off the range.

(13) Smoking will only be done in a safe area designated by the instructor.

(14) IF YOUR NOT SURE, ASK!!!

(15) All other range regulations are per reference (b).

ENCLOSURE (3)

**RANGE SAFETY BRIEF
FOR RANGE 600 BREACHER PIT**

1. The Range Safety Officer (RSO), will give a safety brief to all hands prior to any live fire taking place on range 130. The RSO will read the following in its entirety:

a. I am the Range Safety Officer for today. I am responsible for safety aboard Range 130, and as such have final decision over all matters I consider to be safety related.

b. The fire danger rating procedures will be followed as they pertain to this range. The current fire danger rating is _____.

(13) Smoking will only be done in a safe area designated by the instructor.

(14) IF YOUR NOT SURE, ASK!!!

(15) All other range regulations are per reference (b).

ENCLOSURE (4)

**GUIDELINES FOR INSTRUCTORS
CONDUCTING CQB TRAINING**

1. The Senior Instructor present will give the safety brief with at least one other instructor present.
2. Only qualified CQB instructors are authorized to set up a target site. After the target site is setup, a minimum of two instructors will check to ensure proper target placement.
3. The instructor site coordinator will stage a minimum of three (3) fire extinguishers throughout the target site for any live fire exercise off Range 130.
4. A qualified CQB instructor will place live actors in the target site with the following gear:
 - a. Hearing protection.
 - b. Eye protection.
 - c. Body armor level 3A.
5. The instructor will brief the actors regarding actions upon entry of the strike force.
6. Any live fire runs at the Range 130 house will have a minimum of three (3) instructors on the catwalk.
7. Before making any target site hot, the senior instructor will yell inside: "IS THE HOUSE CLEAR," (WAIT FOR A RESPONSE), "THE HOUSE IS HOT."
8. Target sites outside of Range 130.
 - a. Outside police agencies will be notified of the operation. The senior site coordinator will have a method to communicate with these agencies (i.e. cellular phone).
 - b. Police agencies will be requested to block off avenues of approach.
 - c. A MEDEVAC plan will be issued for the nearest hospital.
 - d. A minimum of one (1) corpsman will be present with a Unit

1.

ENCLOSURE (5)

- e. A safety vehicle will be present with driver.
- f. Local Fire Department will be notified.

ENCLOSURE (5)

RANGE SAFETY BRIEF FOR RANGE 103 SNIPER FIRE

1. The Range Safety Officer (RSO), will give a safety brief to all hands prior to any live fire taking place on Range 130. The RSO will read the following in its entirety:

a. I am the Range Safety Officer for today. I am responsible for safety aboard Range 130, and as such have final decision over all matters I consider to be safety related.

b. The fire danger rating procedures will be followed as they pertain to this range. The current fire danger rating is _____.

c. Ensure range flags are up.

d. Is the safety vehicle on site? Is qualified driver present? If the driver departs with a casualty or for any reason, firing must cease, unless another vehicle with a driver is present. If any type of MEDEVAC occurs all information must be called into Long Rifle. Name of SNM injured, with their SSN, Corpsman, nature of injury and how it occurred. Report this "ASAP"!

e. Is there positive communication with "long rifle"? Is the radio/telephone watch set? Has the request to "go hot" been made? Has it been approved? Long rifle radio checks must be made every 30 minutes when firing is in progress and every hour when cold. If ammo is being stored on the range, hourly radio checks must be made after training until 2200, and start again at 0600 the next day.

f. There must be a non-firing corpsman present during all live fire. If the corpsman leaves, firing must stop.

g. A range sentry will be posted at the entry to the sniper firing area with communication and access roster to prevent unauthorized access to the range during training. Anyone not on the access roster must be called to the NCOIC or OIC of the range for approval. Names must be verified from individual ID cards.

h. The speed limit on Range 130 road is 25 mph unless otherwise posted.

ENCLOSURE (6)
Ch 1 (21 May 93)

i. Ammunition handling:

- (1) Ammunition will be issued only by SOTG instructors.
- (2) Ammunition must be guarded by a minimum of one armed guard when the range is cold.
- (3) You are reminded that it is against regulations to remove any ordnance item, live or blank small arms ammunition, demolition material, to include component parts for charge construction, misfired or dud ammunition or explosive, or any other ordnance expended or unexpected, from the range. Such ordnance items will be turned into the ammunition supply point daily.

j. Range Safety Rules:

- (1) No horseplay.
- (2) Treat all weapons as if they were loaded.
- (3) Be muzzle conscious at all times. Never let your muzzle cover anything you are not willing to destroy.
- (4) Keep your finger off the trigger until you intend to shoot.
- (5) Be sure of your target and its background.
- (6) All weapons must be made completely safe before leaving the firing line.
- (7) All personnel must be behind the muzzle relative to the line of flight while firing from position.
- (8) M40A1's must be made completely safe before changing positions.
- (9) Do not raise or lower the muzzle of the weapon while in the tower until it has been checked both visually and physically to ensure it is clear.
- (10) Anyone may call cease fire.
- (11) Do not take any ammunition from the range.

ENCLOSURE (6)
Ch 1 (21 May 93)

(12) All shooters will have an observer.

(13) Observers will check that line of flight clearance is established when firing through loopholes.

(14) Ensure ammunition is compatible with weapon before loading.

(15) If you are not sure, ASK!!!

(16) All other range regulations are per Base Order P2500.1G.
